Attachment H
Division Street BRT Hazmat Technical Memorandum

Parametrix
let's create tomorrow, together

Technical Memorandum

DATE:	June 26, 2024
TO:	Spokane Transit Authority
FROM:	Sally Nguyen, GIT; Michael Brady, LG/LHG
SUBJECT:	Division Street BRT Hazmat Assessment
PROJECT NUMBER:	374-5618-003
PROJECT NAME:	Division Street BRT Phase 1

Introduction

On behalf of Spokane Transit Authority (STA), Parametrix conducted this hazardous materials assessment for the proposed Division Street Spokane Bus Rapid Transit (BRT) project. The area of interest is a 10-mile corridor along N Division Street, spanning from E Hastings Road (north) to Wall Street/downtown (south) in Spokane, Washington (Figure 1). The route includes approximately 43 proposed BRT stations along the corridor. STA is overseeing the development and construction of the BRT line, and Parametrix has been contracted to support the project by offering planning, designing, and engineering services.

Scope of Work

The purpose of this memorandum is to evaluate the presence of suspected or known hazardous materials or waste within the proposed project corridor. To complete this investigation, records from public agencies, including—but not limited to—the Washington Department of Ecology (Ecology), Washington Department of Natural Resources, and City of Spokane, were observed and evaluated. This memorandum serves as a summary of the findings as it pertains to the environmental integrity of the project.

Corridor Description

The Division Street BRT project includes approximately 43 proposed bus stations along the corridor. The proposed route travels along N Division Street from downtown north to the future Mead Transit Center at Farwell Road (Figure 1). The Division Street Corridor is predominantly commercially developed along the route with residential in the surrounding area.

Physical Setting

The N Division Street corridor ranges in elevation from 1,770 to 2,060 feet above sea level. The lowest portion of the corridor is north of Whitworth Drive, where the elevations range from 1,770 up to 1,930 feet above sea level. The bulk of the corridor between Whitworth Drive and Euclid Avenue is relatively flat, ranging in elevation from 1,930 up to 2,060 feet above sea level. South of Euclid Avenue is a small hill to a lower basin surrounding the Spokane River, ranging in elevation from 1,930 to 1,875 feet above sea level.

The Spokane River runs east to west splitting downtown from North Spokane along the southern portion of the corridor.

Soils and Geology

The prominent soils in the area have been classified as Urban land by the U.S. Department of Agriculture Natural Resources Conservation Service (USDA 2023). These are described as loamy sand and gravelly loam. They are considered well-drained soils, with parent material being sandy glaciofluvial deposits that may also contain minor amounts of volcanic ash and loess in its upper portion.

The surface geology of the subject area is primarily mapped as glacial outburst flood deposits from glacial Lake Missoula. The flood deposits are predominantly mapped as sand (Qfs) or gravel (Qfcg) (Derkey et al. 2004). Overall, the outburst flood deposits are comprised of coarse-grained sand, pebbles, cobbles, and boulders. Additionally, Grande Ronde Basalt (Mgr) of the Columbia River Basalt Group is mapped near the Spokane River and underlying the eastern portion of downtown in the southern project area. The Latah Formation (Mi) is not mapped at land surface along the project corridor; however, the Latah Formation occurs below both the outburst flood deposits and Grande Ronde Basalt. The Latah Formation also occurs as interbeds between basalt flows. The Latah formation is comprised of laminated siltstone, claystone, and minor sandstone. The basalt and Latah Formation were scoured by the glacial outburst flooding events, and the outburst flood deposits are as much as 500 to 600 feet thick below the project area (Derkey et al. 2004).

Hydrogeology

The glacial outburst flood deposits comprise the highly permeable Spokane Valley-Rathdrum Prairie (SVRP) aquifer. As described above, the aquifer and flood deposits are bound by both the Grande Ronde Basalt and Latah Formation below and on the exterior margins (Hsieh et al. 2007).

Groundwater below the majority of the project area is often found between 90 and 120 feet below ground surface within the SVRP aquifer, near elevation 1,850 to 1,820 feet above sea level. Flow within the SVRP aquifer is primarily westerly near downtown and northwesterly for the remainder of the project area (USGS 2016). Near downtown and the Spokane River, the water table is much shallower and less than 50 feet below ground surface. There is also groundwater present in the fractured and porous zones of the Grande Ronde Basalt that may or may not be in hydraulic connection with the SVRP aquifer. The SVRP is highly influenced by the Spokane River, as the river is a significant recharge and discharge source for the aquifer (Spokane County 2022). The Little Spokane River in north Spokane is also a major discharge point of the aquifer. The elevation of the water table is approximately 1,740 feet above sea level, or approximately 35 feet below ground surface, near Hastings Road on the north end of the project area, which is close to the discharge to the Little Spokane River (Hsieh et al. 2007).

BRT Stations

The proposed stations are located along the north-south corridor, with most stations east and west of N Division Street. The stations begin at the proposed Mead Transit Center, and span to downtown Spokane, near the STA Plaza. A map depicting the proposed stations can be found on Figure 1.

Environmental Records Review

The purpose of records review is to gather environmental data and conduct preliminary screening of potential environmental impacts on the subject property. The review consisted of an evaluation of listed known or suspected contaminated sites near the proposed stations along the corridor by reviewing environmental database records and Washington State Department of Ecology (Ecology) cleanup site information (Ecology 2023a) and underground storage tank information (UST) (Ecology 2023b). Supplemental information was also obtained from the Spokane County Assessor's records (Spokane County 2023) and the City of Spokane Permit Center (Spokane 2023a).

No site reconnaissance was required during the course of this assessment because parcel and address information were used to verify the location of listed sites. Aerial photographs from the City geographic information system (GIS) program (Spokane 2023b) and USGS (2023) were also used to evaluate the location and site history.

Environmental Database Review

The EDR report (Appendix A) collates information from available environmental records provided by various regulatory agency databases and files published by federal, state, and municipal agencies for sites up to 1 mile from the BRT corridor. The Map Findings Summary of the EDR report in Appendix A displays the distances searched for each of the environmental databases. The purpose of the EDR report is to provide a list of properties that may be of environmental concern and to be reviewed by an environmental professional.

Primary database listings of concern include the following:

- Underground Storage Tank (UST) List
- Leaking Underground Storage Tank (LUST) List
- Confirmed and Suspected Contaminated Sites List (CSCSL) and Hazardous Site List (HSL)
- Confirmed and Suspected Contaminated Sites List-No Further Action (CSCSL-NFA)
- Ecology Reported Spills (SPILLS) List
- Emergency Response Notification System (ERNS)
- Voluntary Cleanup Program (VCP)
- Independent Cleanup Report (ICR)
- Pollution Liability Insurance Agency (PLIA) Petroleum Technical Assistance Program (PTAP) List
- Ecology Solid Waste Facility/or Landfill (SWF/LF) Site Lists
- Ecology Brownfields/US Brownfields (BROWNFIELDS/US BROWNFIELDS)
- National Priorities List (NPL)
- Superfund Enterprise Management System (SEMS)
- Superfund Enterprise Management System Archive (SEMS-ARCHIVE)
- EDR Historical Auto Stations directory database (EDR HIST AUTO)
- EDR Historical Dry Cleaners directory database (EDR HIST CLEANER)
- EDR Manufactured Gas Plant (EDR MGP)
- Ecology Dry Cleaners (DRYCLEANERS)
- Ecology Inactive Dry Cleaners (INACTIVE DRYCLEANERS)
- Institutional Control Site List (INST CONTROL)
- Orphan/Unmappable Sites

Additional database listings include:

- Corrective Action Report (CORRACTS)
- RCRA – Large Quantity Generators (RCRA-LQG)
- RCRA – Small Quantity Generators (RCRA-SQG)
- RCRA – Very Small Quantity Generators (RCRA-VSQG)
- RCRA – (RCRA-NonGen/NLR)
- Recycling Facility List (SWRCY)
- Facility/Site Identification System Listing (ALLSITES)
- Historical Clandestine Drug Lab (HIST CDL)
- Hazardous Materials Information Reporting System (HMIRS)
- Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA)/Toxic Substances Control Act (FTTS)
- Historical FTTS (HIST FTTS)
- Facility Index System/Facility Registry System (FINDS)
- Enforcement & Compliance History Information (ECHO)
- Asbestos Notification Listing (WA ASBESTOS)
- Hazardous Waste Manifest Data (WA MANIFEST)
- Mineral Resources Data System (MINES MRDS)

The EDR Database identified a total of 1,096 listed sites (some duplicate listings) falling within the standard search criteria. Additionally, EDR identified a total of 386 unmappable (orphan sites) potentially falling within the search criteria.

A summary of the relevant databases is shown below in Table 1.

Table 1. Summary of Primary Databases Listings of Concern

Database Record	Total Sites Identified	ASTM Search Radius (Miles)	Total Sites within ASTM Search Radius	On or in Proximity to the Proposed Stations*
UST	122	0.25	90	49
LUST	50	0.5	25	17
CSCSL/HSL	61	1	12	6
CSCSL NFA	79	1	42	29
SPILLS	23	0.125	23	17
ERNS	2	0.125	2	0
ECY VCP	31	0.5	12	9
ICR	44	0.5	16	6
PLIA PTAP	1	0.5	1	1
SWF/LF	8	0.5	3	0
BROWNFIELDS	1	0.5	0	0
NPL/SEMS	3	1 to 0.5	3	0
EDR HIST AUTO	34	0.125	34	19
EDR HIST CLEANER	14	0.125	14	8
EDR MGP	2	1	2	0
DRYCLEANERS	1	0.5	1	1
INACTIVE DRYCLEANERS	10	0.25	7	5
ORPHAN SITES	386	NA	12	4

* Sites identified within or adjacent to the proposed project stations (within 0.125 miles); only include those in the 10-mile BRT project corridor area.

The first process in the evaluation was screening of sites based on the types of listings and the proximity to the proposed BRT stations. Sites selected for further investigation, namely those near the proposed BRT stations, were additionally evaluated using Ecology, Spokane County, and Spokane city resources.

Evaluation of Impacts to the Project

As noted above, the depth to groundwater is approximately 100 feet below ground surface for the majority of the corridor. Groundwater is much shallower near the Spokane River: within 20 to 50 feet below ground surface. Based upon the depth to groundwater, the migration of contaminants in groundwater is not likely a concern for the majority of sites except for those in the downtown area and just north of the river. The two primary areas of concern for potential impact to the project are related to contaminated soils and migration of contaminants through the vadose zone. Each of the planned locations for stations for the project were evaluated for contaminated sites with potential to impact the project. The evaluation of sites is summarized by the proposed stations discussed below. Sites were determined to have low, moderate, or high potential risk based upon the listings and information from additional sources. If potential moderate or high-risk sites were identified, the details regarding the site are further discussed, and recommendations are provided depending upon the final selection of exact station locations. The distribution of all sites can be seen plotted along the corridor in Figures 2 through 10.

The risk categories (Low, Moderate or High Risk) are provided below (modified from WSDOT 2022):

- Low Risk: This risk level identifies sites of concern where the likelihood for the site to impact the project is low based on the type of listing, period of use, or types of contaminants, or because there was no evidence to suggest that groundwater from the site of concern is impacted, or the contamination from off-site migration is not expected to impact the project.
- Moderate Risk: This risk level identifies sites of concern where the likelihood for the site to impact the project is moderate because of the type or extent of known or suspected contaminants where there are potential migration concerns but no conclusive evidence.
- High Risk: This risk level identifies sites of concern that are known or suspected to be contaminated and will create a liability to the project either in construction liability or by virtue of acquiring all or a portion of the site. If the site has undergone a detailed investigation and a feasibility study, the impacts and remediation costs may already be predicted.

In general, high-risk sites are properties adjacent to proposed BRT stations that are known or suspected to be contaminated and may pose liability to the project. Sites ranked as low or moderate risk are generally sites where there is known or suspected contamination but, based upon proximity, there is not a likely substantial impact to the project.

Mead Transit Center (Farwell Road/US 2)

There were no listed sites within 0.125 miles of the intersection and the Mead Transit Center. No sites were identified having a high risk to the proposed BRT station. Figure 1 displays the area of the transit center.

Stations 1 & 2 Hastings Road/N Perry Street

There were three listed sites within 0.125 miles of the intersection. These were found on ALLSITES, MANIFEST, and UIC databases. There are no potential impacts to the project or proposed BRT station from these sites (Figure 1).

Stations 3 & 4 Hastings Road

There are several listed sites near the intersection of N Division Street and Hastings Road. Figure 2 displays the closest listed sites with potential contamination. No potential high-risk sites were identified based on the proposed location of the BRT stations for the project; however several sites with known or potential contamination are further explained should station locations shift to the north during the design of the project. Table 2, below, summarizes the risk to the project.

Table 2. Listed Sites near N Division Street and Hastings Road

Study ID	EDR ID #s	Site Name	Address	Databases	Potential Risk	Detail
1	2, 424	76 Gas Station	12310 Highway 395	UST, EDR HIST AUTO	Moderate	USTs are located adjacent to the roadway on NE corner.
2	3, 274, 419	Scollards/ Oh Brothers Inc	12310 N Div St Ste 103	EDR HIST CLEANER	Low	Dry cleaner from 1980s to present. No contamination reported.
3	249, 250	Fred Meyer Fuel	12120 N Division St	UST, ALLSITES, SPILLS	Low	Active gas station with SPILLS; tanks are 150 feet from roadway.
4	442	Furniture Dry Cleaning Inc.	12402 N Division St 335	EDR HIST CLEANER	Low	Former dry cleaner 2002 to 2005.
5	496, 497	WSDOT Wandermere	12303 N Division St	MANIFEST, ALLSITES, FINDS, ASBESTOS	Low	WSDOT maintenance facility with minor amount of hazardous waste generated.
6	11, 12	Roadway	12233 N Division St	SPILLS	Low	2001 car crash with 30 gallons of gasoline spilled; 2015 car crash with 5 gallons of gasoline spilled.

1 | 76 Gas Station

There is an active gasoline station on the northeast corner of the N Division Street and E Hastings Road. This site is also listed on the UST and EDR HIST AUTO databases and has been a gasoline station since the 1980s. The gas station is not listed on the LUST or CSCSL databases. However, the USTs and vent pipes are located just north of E Hastings Road, outside of the right-of-way (ROW). There are no reported releases related to the gas station, and the site is located to the north of Hastings Road. Due to the location of the site relative to the planned stations, there should be no impact to the project.

Stations 5 & 6 Hawthorne Road

Listed sites near the proposed N Division Street and Hawthorne Road intersection were reviewed. One potential high-risk site was identified based on the proposed location of the BRT stations for the project. Figure 3 displays the closest listed sites with potential contamination. Table 3, below, summarizes the listed sites near the proposed BRT station.

Table 3. Listed Sites near N Division Street and Hawthorne Road

Study ID	EDR ID #s	Site Name	Address	Databases	Potential Risk	Detail
7	270, 271	Former 7-Eleven	10406 N DIVISION	UST, EDR HIST AUTO	Moderate to High	Three USTs installed in 1982 and removed in 1996. Site is redeveloped into a bank.
8	Orphan S107482568	N/A	1 BLOCK WEST OF DIVISION ON HAWTHORNE	SPILLS	Low	10 gallons of gasoline spilled.
9	432	Fire District 9 Station 1	E 29 HAWTHORNE RD	UST	Low	Former fire station had two USTs installed in 1976 and removed in 1996. Site is redeveloped into parking.
10	16, 353, 354, 355, 356, 357	Divine Division 12/ Exxon	10233 N DIVISION ST	UST, VCP, ALLSITES, LUST, ICR, CSCSL NFA, EDR HIST AUTO	Moderate	Active gas station with SPILLS; tanks are 50 feet from roadway.

7 | Former 7-Eleven

On the northeast corner of the intersection is a former 7-Eleven gasoline station. Three single-wall USTs were installed in 1982 and removed in 1996. The site was later a Bruchi's restaurant until the building was demolished. The current building was constructed in 2017 and is developed as a bank. Contaminants would likely be limited to petroleum hydrocarbons and metals, making this site a medium- to high-risk site. Based on the location of this site and historical use and the location of the BRT Station 6 immediately adjacent, additional investigation may be prudent if the station is to be constructed as currently planned and requires any parcel acquisitions. If the station is to be located in the ROW and no parcel acquisition is required, this site would likely be a moderate potential risk to the project.

10 | Divine Division 12/Exxon

On the southeast corner of the intersection is Divine's gas station and convenience store. This site is listed on EDR HIST AUTO, VCP, ALLSITES, LUST, UST, ICR, CSCSL NFA, and other databases. Ecology records indicate a release was reported in 1994, and the site conducted periodic monitoring between 1994 and 2002. The site achieved a No Further Action (NFA) from Ecology in 2002. The site continues to operate as a gasoline station with operational USTs dating to 1985. Based upon the history of contamination, it may be prudent to conduct a detailed Ecology file review or additional investigation if a station is selected adjacent to the site. Station 6 is currently planned for the northeast corner of the intersection. Moving the station south of the intersection is not recommended due to the Divine gas station.

Stations 7 & 8 Holland Avenue

Listed sites near the proposed N Division Street and Holland Avenue intersection were reviewed. No potential high-risk sites were identified based on the proposed location of the BRT stations for the project; however, several sites with known or potential contamination are further explained should station locations shift during the design of the project. Figure 4 displays the closest listed sites with potential contamination. Table 4, below, summarizes the risk to the project.

Table 4. Listed Sites near N Division Street and Holland Road

Study ID	EDR ID #s	Site Name	Address	Databases	Potential Risk	Detail
11	24	Former Whitworth Co	W 5 HOLLAND AVE	UST	Low	Former kerosene UST installed in 1975 and removed in 1996.
12	25, 503	Martinizing Cleaner	9419/9414 N DIVISION ST	EDR HIST CLEANER	Low	Historical dry cleaner; near Newport Hwy.
13	26	Phillips 66	9309 N DIVISION	EDR HIST AUTO	Low to Moderate	Former gasoline station active from at least 1969 to 1975.
14	17, 18, 19, 20, 21, 22, 387	Circle K/Holiday Gas Station	9720 N DIVISION ST	SPILLS, UST, ALLSITES, FINDS, EDR HIST AUTO, CSCSL NFA	Low to Moderate	Gasoline station from 1980s to the present. Release identified in 2019; minor amount of investigation/remediation completed.
15	27, 456	Jim's American	9220 N DIVISION	EDR Hist Auto	Low to Moderate	Former gasoline station from at least 1969 to 1980.

13 | Phillips 66 Gas Station

On the west side off N Division Street, midway between E Holland Avenue and W Hoerner Avenue, at 9309 N Division Street is a former Philips 66 gasoline station listed on EDR HIST AUTO database. The gas station was active from at least 1969 to 1975. There are no reported cleanups or USTs reported for the site because the period of use predates modern environmental reporting. The site is redeveloped as a commercial strip mall. The site is currently well south of the proposed Station 7 and should not impact the project.

14 | Circle K Gas Station/Holiday Station Store 288

A Circle K Gasoline Station is located 500 feet north of the intersection of N Division Street and Holland Road. The site was previously a Holiday Station store and is listed on SPILLS, UST, ALLSITES, FINDS, EDR HIST AUTO, and CSCSL NFA databases. The USTs for the site were installed in 1987 and upgraded in 1998. A release from the gasoline station was identified in 2019 under the southernmost pump island, and 18 tons of petroleum contaminated soil was removed. Ecology completed a simplified initial investigation, and the site achieved an NFA from Ecology in 2019. Based upon the Ecology records and other listings, there may be additional areas of contamination related to the gasoline station. The gas station is well north of the proposed Station 8 and should not impact the project.

15 | Jim's American

A former gasoline station is located where N Division Street splits at the "Y" to the Newport Highway and N Division Street. This site is listed on the EDR HIST AUTO database and was developed as a Jim's American gasoline service station active from 1969 to at least 1980. There are no reports of

suspected or confirmed contamination; however, the period of use is prior to modern environmental reporting regulations. Station 8 is projected to be at least 500 feet north of this site, and there should be no impact to the project.

Stations 9 & 10 E Magnesium Road/W Price Avenue

Listed sites near the proposed N Division Street and E Magnesium Road/W Price Avenue intersection were reviewed. Figure 4 displays the closest listed sites with potential contamination. No high-risk sites were identified based on the proposed location of the BRT stations for the project; however, one site with known or potential contamination is further explained should station locations shift during the design of the project. Table 5, below, summarizes the information.

Table 5. Listed Sites near N Division Street and E Magnesium Road

Study ID	EDR ID #s	Site Name	Address	Databases	Potential Risk	Detail
16	244	Robert Miller	9024 N DIVISION ST	UST, ALLSITES	Low	Two previous gasoline USTs installed prior to 1964 and removed in 1996. Former USTs located well off the ROW.
17	367, 368	North Spokane Auto Electric	8915 N DIVISION ST	UST, ALLSITES, EDR HIST AUTO	Moderate	Previous USTs on site; a gasoline service station/ automotive repair shop from 1992 to 2014.
18	32	Division and Magnesium Road	DIVISION ST & MAGNESIUM RD	SPILLS	Low	Oil spill from vehicular accident onto an impermeable surface.

17 | North Spokane Auto Electric/Country Homes Service

This site is listed on the UST and EDR HIST AUTO databases. Directory listings show it operated as an auto repair facility and gasoline service station from at least 1992 through 2014. This site had four previous USTs containing leaded and unleaded gasoline, which were all removed in 1996. There is limited information regarding any cleanups performed related to the tanks. The site is located at least 500 feet north of Station 9, and there should be no impact to the project.

Stations 11 & 12 E Lincoln Road/W Cascade Way

Listings near the proposed N Division Street and E Lincoln Road/W Cascade Way intersection were reviewed. Figure 5 displays the closest listed sites with potential contamination. Table 6, below, summarizes the risk to the project. One site was found to have high potential risk to the BRT project.

Table 6. Listed Sites near N Division Street and E Lincoln Road

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
19	340	Monarch Gulf I	8117 N DIVISION ST	EDR HIST AUTO	Low	Gas station active in 2011. Redeveloped.
20	311, 312	Best West Oil Company/Division	8016 N DIVISION	EDR HIST AUTO, UST	Moderate	Gas station active 1989 to 1990. Four USTs containing gasoline installed in 1959 and removed in 1996.
21	35, 36, 37	Altons Tire and Automotive	N 7777 DIVISION ST	EDR HIST AUTO, UST, ALLSITES, FINDS, ECHO	Low	Auto repair shop active from 2001 to 2002. UST containing oil installed 1964 and removed 1996.
22	308, 309	Westco Martinizing Cleaner	7704 N DIVISION ST	EDR HIST CLEANER, INACTIVE DRYCLEANERS, ALLSITES, FINDS, ECHO, RCRA NonGen/NLR	Low	Dry cleaning plant active from 1996 to 2009. Inactive cleaner from 1991 to 2001.
23	320, 321, 322, 351	Zip Trip 5/NomNom	7902 N DIVISION ST	LUST, UST, CSCSL, EDR HIST AUTO, ALLSITES, CSCSL NFA	Moderate to High	Active gas station with confirmed LUST. Cleanup has started for confirmed soil contamination.
24	453	Northgate Laundry	N 7414 DIVISION ST	ALLSITES, RCRA, INACTIVE DRYCLEANERS	Low	Listed in ALLSITES as a hazardous waste generator from 1992 to 2000.
25	594, Orphan S103506 627	COSTCO WHOLESALE	7619 North Division St	ICR, UST, ALLSITES, CSCSL NFA, RCRA NonGen/NLR, Financial Assurance, Manifest	Low	Release from USTs in the 1990s. Achieved NFA status.

20 | Best West Oil Company/Division

Approximately 500 feet north of Lincoln Road was a former gasoline service station that operated from the 1950s through 1990. The site is listed on the UST and EDR HIST AUTO databases as owned by Big West Oil Company. The site has been redeveloped and there is little evidence of the prior use. This former gas station site is approximately 500 feet north of proposed Station 12, and there should be no impact to the project.

23 | Zip Trip 5

This site is currently active as a NomNom gas station and convenience store. The site is listed on the LUST, UST, ALLSITES, CSCSL, CSCSL NFA and EDR HIST AUTO databases (EDR ID numbers 320, 321, 322). The site has been a gasoline station since the 1960s. There are multiple releases listed for the property. The first release occurred in 1993, and the site achieved an NFA in 2011. An additional release was reported in 2017 that remains unresolved. Both releases are reported to be fuels to soil. This site is located east across the intersection from Station 11 and north across the intersection from Station 12. The extent of the release from this site is not currently known but is unlikely to migrate across the intersection in soils only. Therefore, this site should be a moderate risk

to the project. If Station 12 were to shift further north and require parcel acquisition, this site may require additional investigation and has the potential to be a high risk to the project.

Stations 13 & 14 E Weile Avenue/W Rhoades Avenue

There were several listed sites within 0.125 miles of the intersection of E Weile Avenue and W Rhoades Avenue with N Division Street. These were found on ALLSITES, MANIFEST, RCRA, FINDS, and ECHO databases. No potential risks from listed sites were identified within 0.125 miles of the intersection of N Division Street and E Weile Avenue/W Rhoades Avenue (Figure 5).

Stations 15 & 16 N Francis Avenue

Several listed sites near the N Division Street and N Francis Avenue intersection were reviewed. Figure 6 displays the listed sites near these stations with potential risk to the project. One site with historic USTs was found adjacent to the proposed BRT stations. Table 7, below, summarizes the risk to the project.

Table 7. Listed Sites near N Division Street and N Francis Avenue

Study ID	EDR ID #s	Site Name	Address	Databases	Potential Risk	Detail
26	612, 613, 614	Darigold Spokane	33 E FRANCIS AVE	LUST, UST, ICR, ALLSITES, CSCSL NFA, SPILLS, ASBESTOS, 27MANIFEST, NPDES, 28RCRA-VSQG	Low	Oil spill from vehicle in 2009. Received an NFA in 2012. No institutional controls in place. Over 350 feet away.
27	386	Quik Stop 36	6302 N DIVISION ST	UST, ALLSITES, FINDS	Moderate to High	Three USTs containing leaded and unleaded gasoline installed prior to 1964 and removed in 1996.
28	40, 47, 48	KMART 4155	6606 N Division	LUST, UST, ALLSITES, CSCSL NFA, RCRA NonGen/NLR, FINDS, ECHO, MANIFEST, RGA LUST	Low	Former K-mart waste oil tank that leaked. Location at least 400 feet east of N Division Street.

27 | Quik Stop 36

On the northeast corner of the intersection of N Division and N Francis Avenue is a former Quick Stop gasoline station identified on UST, ALLSITES, and FINDS databases. The USTs were in use between the 1960s and 1996 and contained unleaded gasoline. The site has been redeveloped into a pet store. Station 16 is planned for the northeast corner of the intersection adjacent to this site. If the station is located in the ROW, this site is likely a moderate risk to the project. If there is parcel acquisition required for Station 16, this site may be a potential high risk to the project.

Stations 17 & 18 Central Avenue

Two listed sites were found to have potential risk near the proposed N Division Street and Central Avenue intersection. Figure 6 displays the listed sites. No high-risk sites were identified based on the proposed location of the BRT stations for the project; however, one site with known or potential contamination is further explained should station locations shift during the design of the project. Table 8, below, summarizes the sites in the area of Stations 17 and 18.

Table 8. Listed Sites near N Division Street and Central Avenue

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
29	328, 329	Chevron 7003	6005 N DIVISION ST	ICR, LUST, UST, ALLSITES, CSCSL NFA	Moderate	LUST discovered in 1990. USTs containing gasoline and oil removed in 1996. Received an NFA in 2011.
30	298	Montgomery Ward Spokane	5830 N DIVISION ST	UST, ALLSITES, RCRA NONGEN/NLR, FINDS, ECHO	Low	One UST contained oil; installed prior to 1964 and removed in 1996. Approximately 500 feet from ROW.

29 | Chevron 7003

This site was a former Chevron gasoline station listed on the EDR LUST, UST, and CSCSL NFA databases. This site had a release of petroleum hydrocarbons dating to 1990. After a long period of inactivity, the site status was changed to NFA in 2011. There is limited information available online in Ecology records. This site is located approximately 200 feet north of the proposed Station 17, and there should be no impact to the project.

Stations 19 & 20 E Rowan Avenue

There were several listed sites within 0.125 miles of the intersection of N Division Street and E Rowan Avenue. These were found on ALLSITES, MANIFEST, RCRA, and FINDS databases. There are low potential risks to the project and proposed BRT station from these sites (Figure 6).

Stations 23 & 24 Wellesley Avenue

Five listed sites near the proposed N Division Street and Wellesley Avenue intersection were identified to have potential risk to the project. Figure 7 displays the closest listed sites with potential contamination. Table 9, below, summarizes the risk to the project. Two sites were found to have a potential high risk to the project.

Table 9. Listed Sites near N Division St and Wellesley Avenue

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
31	449	Sears Roebuck & Co	600 NORTHTOWN SHOPPING CENTER	UST, ALLSITES	Low	Six former oil USTs installed prior to 1964 and removed in 1996. Approximately 500 feet from ROW.

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
32	310	Firestone Northtown 4824	4504 N DIVISION	UST, ALLSITES	Low	One former oil UST installed prior to 1964 and removed in 1996.
33	517, 518, 519	Wendle Ford Motors Inc	4727 N DIVISION ST	UST, VCP, FINDS, ECHO, ALLSITES, CSCSL NFA	Moderate	This site had previously reported soil contamination and received an NFA in 2009. Site has been redeveloped.
34	346, 347	Northtown Chevron	4615 N DIVISION ST	LUST, UST, ALLSITES, CSCSL NFA, EDR HIST AUTO	Moderate	Active gas station with previously reported soil contamination.
35	389, 390, 391	New Concepts Auto Service/Goodyear 8949	4423 N DIVISION	LUST, UST, ICR, ALLSITES, CSCSL NFA, RCRA, FINDS, ECHO, VCP	Low	LUST release in 1997. An oil UST installed prior to 1964 was removed in 1996. The site had previously reported soil contamination and received an NFA in 1998. Site has been redeveloped.

33 | Wendle Ford Motors Inc

Located northwest of the intersection was a former Wendle Ford Motors car dealership and automotive repair site listed on the EDR VCP and CSCSL NFA databases. This site had previous soil contamination identified in additional investigation environmental site assessment (ESA) in 2008. Two USTs historically served the property and have since been removed. A limited cleanup was performed, and the site achieved an NFA from Ecology in 2009. There is limited information available online in Ecology records, but previous contamination sources are estimated to be at least 100 feet from the ROW. Based upon the location of proposed Station 23 relative to the historical contamination, there should be no impact to the project.

34 | Northtown Chevron (EDR Site ID Numbers 346, 347)

Currently a Cenex gas station, this site had previously been a Northtown Chevron gasoline service station listed on the EDR HIST AUTO, LUST, UST, and CSCSL NFA databases. This site had previous soil contamination reported in 1989. After a period of inactivity, the site was granted an NFA status in 2012. This gas station is south of the intersection and south of the proposed Station 23. There should be no impact to the project if the station remains north of the intersection.

Stations 25 & 26 E Empire Avenue/W Garland Avenue

Listings near the proposed N Division Street and Empire/Garland Avenue intersection were reviewed. Figure 7 displays the closest listed sites with potential contamination. No high-risk sites were identified based on the proposed location of the BRT stations for the project; however, two sites with known or potential contamination are further explained should station locations shift during the design of the project. Table 10, below, summarizes the risk to the project.

Table 10. Listed Sites near N Division Street and Garland Avenue

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
36	76	Intersection	INTERSECTION OF DIVISION & GARLAND	SPILLS	Low	Reported SPILL from vehicular accident.
37	315	Ray Browns Tire Center	4218 N DIVISION	LUST, UST, ALLSITES, CSCSL NFA	Low	Previously reported soil contamination and LUST.
38	301	W C Graham Jr	4006 N DIVISION	ALLSITES, UST	Moderate	Five previous oil USTs installed prior to 1964 and removed in 1996.
39	302	Commercial Property	3721 N DIVISION ST	ALLSITES, CSCSL NFA	Low	Active and historical auto repair shop with previously reported soil contamination of metals, polycyclic aromatic hydrocarbons, and petroleum hydrocarbons in a dry well. NFA in 2016.
40	75	Summit Cleaners	3902 N DIVISION	EDR HIST CLEANER	Moderate	Historic dry cleaner active from 1969 to 1975.

38 | W C Graham Jr

Approximately 500 feet north of the intersection is a former gasoline station. The site has not been redeveloped and was originally built in 1950. Five USTs were removed from the property in 1996. No additional information was available regarding the site. The gas station is over 500 feet north of proposed Stations 25 and 26, and there should be no impact to the project.

40| Summit Cleaners

At the northeast corner of the intersection of N Division Street and E Empire Avenue is former dry cleaner that was active from at least 1969 through 1975. The site is listed on the EDR HIST CLEANER databases (EDR Site ID number 75). The former dry cleaner is located east across the intersection from Station 25 and north across the intersection from Station 26. Suspected contaminants from this site are likely to migrate vertically in soil rather than horizontally; therefore, there should be no impact to the project.

Stations 27 & 28 E Bridgeport Avenue

Listings near the proposed N Division Street and E Bridgeport Avenue intersection were reviewed. Additional aerials and street images were reviewed. Figure 8 displays these sites near the N Division Steet and E Bridgeport Avenue stations. As noted in Table 11, no high-risk sites were identified based on the proposed location of the BRT stations for the project; however, one site with known or potential contamination is further explained should station locations shift during the design of the project.

Table 11. Listed Sites near N Division Street and E Bridgeport Avenue

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
41	299	Spokane Fire Department Station 10	3608 N DIVISION	LUST, UST, ALLSITES, CSCSL NFA	Low	LUST release reported in 1993. NFA received in 2012 after a period on inaction.
42	N/A	Becker's Used Cars	3518 N DIVISION	N/A	Moderate	Former gasoline station site has not been redeveloped. No listings on EDR report. Gas station built in 1962.
43	79, 82	Ulricks Transmission Service	3100 N DIVISION	EDR HIST AUTO, SPILLS	Low	Automotive repair shop active from 1989 to 2014.

42 | Beckers Used Cars

This site is not listed on the EDR report but is clearly visible as a former gasoline station, with a canopy and former fueling near the roadway. The assessor indicates the building was built in 1962. The gasoline station likely ceased operations prior to the 1990s. Four vent pipes are visible on the north side of the building indicating the tanks remain in place. The former gas station is over 500 feet from the proposed stations and there should be no impact to the project.

Stations 29 & 30 W Buckeye Avenue/E North Foothills Drive

The BRT line splits just north of W Buckeye Avenue and E North Foothills Drive into N Division Street (southbound) and N Ruby Street (northbound). Listings near the proposed intersections were reviewed. No high-risk sites were identified based on the proposed location of the BRT stations for the project; however, one site with known or potential contamination is further explained should station locations shift during the design of the project. Figure 8 displays the closest listed sites with potential contamination. Table 12, below, summarizes the risk to the project.

Table 12. Listed Site bear N Division Street and N Ruby Street

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
44	223, 224	JR's Town Pump Carwash	2725 N DIVISION ST	EDR HIST AUTO, LUST, UST, ALLSITES, CSCSL NFA, FINDS	Moderate	Previously reported soil contamination in 1992. NFA in 2012.
45	84, 85	Pro-Performance Lube Center	2736 N DIVISION	UST, ALLSITES, FINDS, SPILLS	Low	Active oil change service station with reported spills. Three previous oil USTs installed prior to 1964 and removed in 1996.
46	286	Discover Audio	2529 N DIVISION	UST, ALLSITES	Low	Two previous gasoline USTs installed prior to 1964 and removed in 1996. Approximately one block south.
47	94	Johnson Lyle	2405 N DIVISION	EDR HIST AUTO	Low	Historic gasoline service station active from 1973 to 1993.

44 | JR's Town Pump Carwash

This site located on the northwest corner of N Division Street and W Buckeye Avenue and was a gasoline service station. Permit records indicate it was built in the 1940s and information from EDR show the gas station use continued through at least 1994. A release to soil was first reported in 1992. The site achieved an NFA in 2012 after a period of inaction. The site is currently vacant and undeveloped. The former gas station is located 200 feet north of proposed Station 29, and there should be no impact to the project.

Stations 31 & 32 Indiana Avenue

Listings near the intersection of N Division Street and N Ruby Street with Indiana Avenue were reviewed. Figure 9 displays the closest listed sites with potential contamination. No potential moderate or high-risk sites were identified.

Stations 33 & 34 Mission Avenue

Listed sites near the proposed N Division Street/N Ruby Street with Mission Avenue intersections were reviewed. No high potential risk sites were identified based on the proposed location of the BRT stations for the project; however, several sites with known or potential contamination are further explained should station locations shift during the design of the project. Figure 9 displays the listed sites. Table 13, below, summarizes the risk to the project.

Table 13. Listed Sites near N Division Street and Mission Avenue

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
48	109, 111, 112	Jopo Inc	1712 N DIVISION ST	EDR HIST AUTO, UST, FINDS, ALLSITES, FINANCIAL ASSURANCE	Low to Moderate	Active gasoline station from 1970s to present.
49	348	Q-Lube Division/Jiffy Lube 2325	1430 N DIVISION ST	ALLSITES, CSCSL NFA	Low	Previously reported soil contamination from oil-range total petroleum hydrocarbons. NFA received in 2000.
50	113	Robert Rothwell Property/Brad McHenry Site	E 130 MISSION	ALLSITES, CSCSL NFA, RCRA, INACTIVE DRYCLEANERS	Low	NFA received in 1996 for petroleum. Site remains undeveloped. No investigation for dry cleaning solvents.
51	374	Unocal 0571	1427 N DIVISION ST	UST, ALLSITES	Moderate	Three previous USTs removed in 2004.
52	409	Patricia Hatch	50 W MISSION	UST	Moderate	Two previous gasoline USTs installed removed 1996. Site redeveloped in 2001.
53	281	Precision Tune	1403 N DIVISION	UST, ALLSITES	Low	One 1,000-gallon waste oil UST removed; closed in 2002.
54	Orphan S127874 880	JEFF'S CUSTOM DETAIL	14 E AUGUST AVE	SPILLS	Low	Dumping of unknown chemicals to the ground.

48 | Jopo Inc

Located 450 feet north of the intersection is an active Chevron, previously a Jopo Inc. gasoline service station. Three USTs containing leaded and unleaded gasoline were removed from the site in 2017, and two replacement tanks were installed. This site has been a gasoline station since at least 1971. Based on the period of use, if the location of Stations 33 and 34 are shifted to the north, adjacent to this site, additional investigation would be recommended to evaluate the potential presence of contamination from the historic use of the property.

51 | Unocal 0571

On the southwest corner of the intersection of N Division Street and Mission Avenue is a used car dealership. The site is a former gasoline station built in 1989. Permit records indicate a gas station also occupied the site prior to the current development and was demolished in 1988. Three USTs were removed from the site in 2004. There is no further information on the database report. If the location of Station 33 is shifted to the south, adjacent to this site, additional investigation would be recommended to evaluate the potential presence of contamination from the historic use of the property.

52 | Patricia Hatch

On the northwest corner of the intersection of N Division Street and Mission Avenue is a former gasoline station. The site is listed as having two former USTs containing leaded gasoline that were removed 1996. The site was redeveloped into a commercial retail building in 2001. No other environmental information is available. Station 33 is planned for the northwest corner of the intersection, adjacent to this property. Project contractors should adhere to a contaminated media management plan if contaminated soil is encountered in this area.

Stations 35 & 36 Sharpe Avenue

Listed sites near the proposed N Division Street and N Ruby Street with Sharpe Avenue intersections were reviewed. Figure 9 displays listed sites that were further evaluated. Table 14, below, summarizes the potential risk to the project. No high-risk sites were identified based on the proposed location of the BRT stations for the project; however, one site with known or potential contamination is further explained should station locations shift during the design of the project.

Table 14. Listed Sites near N Division Street and Sharpe Avenue

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
55	125, 126, 127	Market Equipment Co	1114 N RUBY ST	HAZNET, UST, ALLSITES, RCRA, FINDS, ECHO, MANIFEST	Low	One UST that is closed in place.
56	544	Maintenance Shop	1100 N PEARL ST	UST, ALLSITES	Low	Three previous gasoline USTs installed prior to1964 and removed in 1996.
57	444, 445	Cascade Seed/Gonzaga University	128 E DESMET AVE	ICR, LUST, UST, ALLSITES, CSCSL NFA	Low	LUST release reported in 1991. Received NFA in 2011.

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
58	134, 135	Western Millwrights/PPG I ndustries	1005 N RUBY ST	FINDS, ECHO	Moderate	Former industrial mill building with large grain elevator and paint manufacturer.
59	242	Sharp Automotive	1306 N DIVISION	UST, ALLSITES, FINDS	Moderate	Six previous gasoline and heating oil USTs installed in the 1950s removed in 1996.

58 | Western Millwrights/PPG Industries

This industrial site is located between N Division Street and N Ruby Street, north of Cataldo Avenue. The old mill and industrial tanks are present on the site. The site was first developed in 1922. Western Millwrights was built in 1932, and the grain elevator was built in 1947, according to the assessor. Grain elevators often stored agricultural fumigants. The site is over 1,000 feet south of the proposed stations and there should be no impact to the project.

59 | Sharp Automotive

This site is located northeast across the intersection from proposed Station 35 and previously operated as a gasoline station from the 1950s. There is no information regarding cleanups completed at the site, and based upon the age, the releases predate modern environmental reporting. However, based upon the location, there is limited potential for soil migration across the ROW. Deep groundwater may be present; however, the gradient is primarily northerly. Therefore, there should be no impact to the project.

Stations 37 & 38 N River Drive

N Division Street and N Ruby Street merge just north of the Spokane River. Listed sites near the intersection were reviewed. Figure 9 displays the location of three sites that were identified having potential risk to the project. Table 15 summarizes the sites.

Table 15. Listed Site near N Division Street and N River Drive

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
60	292, 293, 294	Zip Trip Store 35	909 N DIVISION ST	VCP, INST CONTROL, ALLSITES, CSCSL NFA, LUST, UST	Moderate	LUST release reported in 2007. NFA received in 2013. Remaining soil contamination under building/structures.
61	136	Northbank Development	E CATALDO AVE & N DIVISION ST	ALLSITES, CSCSL NFA, FINDS	Moderate	Previously had petroleum hydrocarbons and metals impacting soil. Received an NFA in 2006.
62	138, 141, 142, 143, 144	Cataldo Square LLC	922 N DIVISION ST	EDR HIST AUTO, CSCSL, DRYCLEANERS , VCP, INACTIVE DRYCLEANERS , EDR HIST CLEANER	Moderate	Historic gasoline service station active from 1973 to 1976. Active soil contamination and cleanup started, and there is an active monitoring plan in place in addition to institutional controls.

60 | Zip Trip Store 35

This site is an active NomNom gas station and convenience store located at the southwest corner of the intersection of N Division and Cataldo Avenue. There are currently three operational USTs on the site containing diesel and unleaded gasoline. The site is listed on the VCP, CSCSL NFA, LUST, and UST databases (EDR Site ID numbers 292, 293, and 294) related to a release impacting soil and groundwater. Groundwater monitoring found that concentrations had fallen below cleanup levels; however, there is remaining soil contamination below existing buildings. Because of this, an environmental covenant was put by in place to restrict activities that would expose the contamination. An asphalt cap was put in place to prevent exposure, and the property currently has an NFA status stating that cleanup at the site is complete. The stations are located approximately 500 feet south of this site, and there should be no impact to the project.

61 | Northbank Development

This site is listed at the intersection of N Division Street and Cataldo Avenue and previously had a release of petroleum hydrocarbons and metals. The site was in Ecology's VCP for some time. The soil contamination was reportedly remediated below cleanup levels, and the site achieved an NFA in 2006 through the initial investigation. The stations are located over 500 feet southwest of this site, and there should be no impact to the project.

62 | Cataldo Square LLC

South of Cataldo Avenue between N Division Street and N Ruby Street is a small shopping center that contains a former dry cleaner with a known release. Soils have been partially remediated, and there is a restrictive covenant in place. Contaminated soils remain in the surrounding right of ways, the south neighboring property, and under the main retail building. Based on the location of this site being at least 500 feet north of the proposed stations, there should be no impact to the project.

Station 39 N Browne Street/W Main Avenue

Listed sites near the proposed N Browne Street and W Main Avenue intersection were reviewed. Figure 10 displays the closest listed sites with potential contamination. Area-wide contamination was identified related to the south shoreline of the Spokane River. Table 16, below, summarizes the potential risk to the project from the listed sites.

Table 16. Listed Sites near N Brown Street and W Main Avenue

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
63	422, 423	Spokane Convention Center Expansion	332 N SPOKANE FALLS CT	VCP, INST CONTROL, ALLSITES, CSCSL NFA	High	Received an NFA in 2019. Remaining soil contamination is under an asphalt cap.
64	439, 440, 516, 543	Sheraton Spokane Hotel Property	322 N SPOKANE FALLS CT/ 200 W SPOKANE FALLS BLVD	VCP, ALLSITES, CSCSL NFA, INST CONTROL, ICR	High	Received an NFA in 2007/2008. Remaining soil contamination is under an asphalt cap and/or building structures.
65	151	Budget Rent a Car	228 N BROWNE ST	LUST, UST, CSCSL NFA	Moderate	LUST release reported in 1994. The site received an NFA in 2011.
66	232, 233, 234, 236, 237, 241	Exxon 72706/ Sterling Savings	206 – 214 W RIVERSIDE AVE	RCRA, CSCSL, LUST, ICR, UST, CSCSL	Low	Previously reported soil contamination. An NFA was

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
				NFA, ALLSITES, US BROWNFIELD		received in 2021. Property has been redeveloped.

63 & 64 | Spokane Convention Center Expansion & Sheraton Hotel

South of the Spokane River and west of N Division Street is the Spokane Convention Center and the Sheraton Hotel. These sites have soil contamination from polycyclic aromatic hydrocarbons (PAHs) and metals and groundwater impacts. These sites have been cleaned by excavating or capping contaminated soils and managing removed groundwater. Contamination remains in soil; however, detections remain at levels under clean-up standards. These sites have a restrictive environmental covenant and an NFA status. Adjacent to the Convention Center, further west, is Riverfront Park, which is also under a restrictive covenant related to metals and PAHs.

The area on the south side of the Spokane River was historically used for industrial purposes prior to redevelopment and may be impacted with PAHs and metals. No stations are planned along Spokane Falls Boulevard; however, additional investigation is recommended for any station in the vicinity of the intersection of Spokane Falls Boulevard and N Division Street. Station 39 is currently located south of the area that is likely contaminated.

65 | Budget Rent a Car

This site is located on the northwest corner of the intersection of N Browne Street and W Main Avenue and is a former Budget rental car facility that had eight USTs that were removed in 1996. A release from the site was first reported in 1994. In 2011, after a long period of inaction, the site was granted an administrative NFA. Station 39 is planned for south of the intersection, and contaminants from this site are not anticipated.

Station 40 N Division Street/Main Avenue

Listed sites near the intersection of N Division Street and Main Avenue were reviewed. Figure 10 displays the closest listed sites with potential contamination. Table 17, below, summarizes the risk to the project. No high-risk sites were identified based on the proposed location of the BRT stations for the project; however, several sites with known or potential contamination are further explained should station locations shift during the design of the project.

Table 17. Listed Sites near N Division Street and Main Avenue

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
67	464, 465, 490	Riverpoint Project Marriott Hotel/ Atomic Chemical Corp	311 N RIVERPOINT	CSCSL NFA, ALLSITES, SEMS-ARCHIVE	High	Previously reported soil and groundwater contamination. Site has an NFA.

73	228	SALVATION ARMY UST 102061	20 W RIVERSIDE	UST, ALLSITES, FINDS	Low	One previous gasoline UST installed prior to 1964 and removed in 1996.
74	227	Spokane Fire Department Station 1	44 W RIVERSIDE	UST, ALLSITES	Low	Two previous USTs containing diesel and unleaded gasoline installed in 1979 and removed in 1996.
75	282, 283	Thudpuckers	41 W RIVERSIDE AVE	ALLSITES, UST	Low	One previous oil UST since removed.

67 | Riverpoint Project Marriott Hotel/Atomic Chemical Corp

This site is located on the northwest corner of the intersection of N Division and Spokane Falls Boulevard. This site had previous groundwater and surface water contamination related to metals and PAHs similar to the Convention Center site and area-wide contamination along the south shore of the Spokane River. Station 40 is currently planned to be south of Main Avenue and is likely outside of the footprint of the area-wide contamination.

69 | Midas Muffler Spokane/Sterling Property

This site is located on the southwest corner of the intersection of N Division Street and Spokane Falls Boulevard. A release of petroleum hydrocarbons and metals were identified below the site, potentially related to the area-wide contamination. Groundwater contamination is also suspected. The site is currently in the VCP, requiring further remedial actions. Station 40 is located approximately 400 feet south of this site, and there should be no impact to the project.

71 & 72 | Division Gateway Project

These listings are related to the Division Gateway project, during which three USTs were identified in the ROW. Two of the USTs at 3 and 4 W Riverside Avenue had releases and are awaiting formal cleanup from Ecology. Contaminants related to this site are predominantly related to fuels, and there should be no to minimal impact to the project.

Stations 41 & 42 N Bernard Street

Listed sites near the proposed N Bernard Street intersections with Sprague Avenue and W Riverside Avenue were reviewed. None were found to have moderate or high potential risk to the project.

Station 43 W Sprague Avenue/Stevens Street

Multiple listed sites were found near the Sprague Avenue and Stevens Street intersection. Figure 10 displays the sites. Table 18, below, summarizes the potential risk to the project from the listed sites. No sites were identified as having a high potential risk to the project.

Table 18. Listed Sites near Sprague Avenue and Stevens Street

Study ID	EDR ID #s	Site Name	Address	Databases	Risk	Detail
76	401, 402	City Ramp Garage	430 W 1ST AVE	VCP, LUST, UST, ALLSITES, CSCSL NFA, FINDS	Low	LUST release reported in 2010. NFA received in 2010 through Voluntary Cleanup Program.

79	182	Beacon Services Inc	9 N STEVENS ST	EDR HIST CLEANER	Low	Dry cleaning plant active from 1994 to 2007.

77 | Myers Cleaners

This former dry cleaner from the 1980s is located southeast of Station 43. There are no listings related to contamination; however, contaminants from dry cleaners primarily migrate vertically. The station is approximately 200 feet away from this site, and there should be no impact to the project.

STA Transit Plaza (Station 44 W Riverside Avenue/N Wall Street)

Multiple listed sites were found near the intersection of W Riverside Avenue and N Wall Street, denoted as STA Transit Plaza.. No sites were identified as having a moderate or high potential risk to the project (Figure 10).

Station 45 W 2nd Avenue/S Wall Street

There were many listed sites near the intersection of W 2nd Avenue and S Wall Street intersection. Figure 10 displays the nine sites that were further evaluated. Table 19, below, summarizes the potential risk to the project from the listed sites. No high-risk sites were identified based on the proposed location of the BRT stations for the project; however, one site with known or potential contamination is further explained should station locations shift during the design of the project.

88	591	Spokane Gas Light and Coke Co	S WASHINGTON ST	EDR MGP	Low to Moderate	Former manufactured gas plant.

88 | Spokane Gas Light and Coke Co

There is a former manufactured gas plant located approximately 1,000 feet east of Station 45. The area is immediately south of the BNSF railroad. Buildings near station 45 were developed around 1900 to the 1920s, indicating the area has been commercial for a long period of time. Based on the location relative to Station 45, this site should have no impact to the project.

Summary

The majority of sites near the corridor are low to moderate risk to the project. However, a review of EDR database information and information from Ecology and other sources indicates several sites may be moderate to high risk to the project if a station is slated for construction adjacent to the property and if it would require acquisition or excavation into soils. Several sites with historical contamination appear to have been granted administrative NFA determinations without any further remedial actions following a reported release.

Except for areas surrounding the Spokane River, the majority of contaminated or suspected contaminated properties are impacting soil and could potentially have vapor. Soil contamination through direct contact would likely impact construction workers. If soil contamination is identified or excavation is near soil contamination, there may also be harmful vapors that could impact workers.

Project contractors should adhere to a Contaminated Media Management Plan (CMMP) if contaminated soil is encountered during the project. For parcel acquisitions related to moderate or

high risk sites, additional Ecology file reviews of historical or current release information, or potential Phase I ESAs or Phase II ESAs are advisable.

Vapor exposure risk is also a longer-term health hazard risk related to repeated and persistent exposures. However, because there are no closed-door structures related to the stations where vapors could accumulate, vapor exposure risk to the general public is likely minimal.

Conclusions

Parametrix reviewed an environmental database search and identified and screened sites within the Division Street BRT Corridor that have known or suspected conditions that could impact the project. A total of 1,096 sites and 386 orphan sites were identified by EDR as being in proximity to the proposed Division Street BRT project. The majority of sites were found to have low potential risk and no likely impact to the project. Several sites were identified as having moderate to high potential risk. Additional investigation may be necessary to resolve some potential moderate or high-risk sites depending upon the selection of station locations and potential partial or full parcel acquisitions. A CMMP should be developed for the project for contractors to adhere to during construction of the stations.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System

BEKKERING AUTOMOTIVE INC (Continued) **1016206237**

(RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110070744384

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110070749379

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Waste Code:	U159
Waste Description:	2-Butanone (I,T) (Or) Methyl Ethyl Ketone (Mek) (I,T)
Waste Code:	U165
Waste Description:	Naphthalene
Waste Code:	U210
Waste Description:	Ethene, Tetrachloro- (Or) Tetrachloroethylene
Waste Code:	U220
Waste Description:	Benzene, Methyl- (Or) Toluene

LOWES HOME CENTERS LLC 3045 (Continued) **1018282601**

Waste Code: U240
Waste Description: 2,4-D, Salts & Esters (Or) Acetic Acid, (2,4-Dichlorophenoxy)-, Salts & Esters (Or) Dichlorophenoxyacetic Acid 2,4-D

Waste Code: U249
Waste Description: Zinc Phosphide Zn3p2, When Present At Concentrations Of 10% Or Less

Waste Code: U279
Waste Description: U279

Waste Code: U411
Waste Description: U411

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

FINDS:
Registry ID: 110070756757

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
Registry ID: 110009512429

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup,

NORTHTOWN MALL (Continued) **1000878989**

and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

SEARS ROEBUCK & CO 1029 (Continued) **1005445482**

Registry ID: 110070746307

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Hazardous Waste Summary:
Waste Code: D001
Waste Description: Ignitable Waste

Waste Code: D002
Waste Description: Corrosive Waste

Waste Code: D005
Waste Description: Barium

Waste Code: D006
Waste Description: Cadmium

Waste Code: D007
Waste Description: Chromium

Waste Code: D008
Waste Description: Lead

Waste Code: D011
Waste Description: Silver

Waste Code: D016

SEARS ROEBUCK & CO 1029 (Continued) **1015751858**

Waste Description: 2,4-D (2,4-Dichlorophenoxyacetic Acid)

Waste Code: D018
Waste Description: Benzene

Waste Code: D035
Waste Description: Methyl Ethyl Ketone

Waste Code: D039
Waste Description: Tetrachloroethylene

Waste Code: D040
Waste Description: Trichlorethylene

Waste Code: F003
Waste Description: The Following Spent Nonhalogenated Solvents: Xylene, Acetone, Ethyl Acetate, Ethyl Benzene, Ethyl Ether, Methyl Isobutyl Ketone, N-Butyl Alcohol, Cyclohexanone, And Methanol; All Spent Solvent Mixtures/Blends Containing, Before Use, Only The Above Spent Nonhalogenated Solvents; And All Spent Solvent Mixtures/Blends Containing, Before Use, One Or More Of The Above Nonhalogenated Solvents, And A Total Of Ten Percent Or More (By Volume) Of One Or More Of Those Solvents Listed In F001, F002, F004, And F005; And Still Bottoms From The Recovery Of These Spent Solvents And Spent Solvent Mixtures.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup,

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Registry ID: 110070755763

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:

All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

FINDS:
Registry ID: 110005394803

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.
Registry ID: 110070754950

Click Here for FRS Facility Detail Report:

Environmental Interest/Information System:
All generators and treatment, storage, and disposal (TSD) facilities who handle hazardous waste are required to report to the EPA Administrator at least once every two years. The data collected is used to create the National Biennial Resource Conservation and Recovery Act (RCRA) Hazardous Waste Report. This data is processed within the RCRA Information (RCRAInfo) database

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Comments:	Emergency: They need to repair the HVAC so they can get the heat back up and running I called Mark Wilson and he was out said to call Rodriguez so I did and left a message and then I called again still out so then I called the Tum Water location as instructed and was sent to Larry Gore and he was away from his desk so I left him a voicemail as well. So I have tried contact several times.. We are scheduled to do the work monday Morning 8th of January so they can get the repairs done and get the heat back on. Also updated the supervisor on site...

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The National Pollutant Discharge Elimination System (NPDES) module of the Integrated Compliance Information System (ICIS). Under NPDES, all facilities that discharge pollutants from any point source into waters of the United States are required to obtain a permit. The permit will likely contain limits on what can be discharged, impose monitoring and reporting requirements, and include other provisions to ensure that the discharge does not adversely affect water quality.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Environmental Interest/Information System:
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the

MYERS CLEANERS (Continued) **1016205820**

Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:
The Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Department of Ecology. The system contains key information for each facility/site that is currently, or has been, of interest to the departments air quality, dam safety, hazardous waste, toxic cleanup, and water quality programs.
The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

Click this hyperlink while viewing on your computer to access additional FINDS: detail in the EDR Site Report.
